

Oklahoma Municipal League Annual Convention a Big Success

With cities large and small adopting compressed natural gas (CNG) to fuel their city vehicles, Tulsa Gas Technologies gathered all the major players in CNG into one display for the two day trade show. Participating companies included: CenterPoint Energy, Arkansas/Oklahoma Gas Company, Crane Carrier, Blue Energy Fuels, Perfection Equipment, Tulsa Gas Technologies, Dixie Chopper, and Small Arrow Engineering, and Wilco Machine & Fab.

Visitors to our booth heard about the significant savings in fuel cost that can be realized by converting vehicles to run on CNG and also the large number of heavy trucks manufactured in Oklahoma that come from the factory ready to run on CNG. All the participating companies have facilities in Oklahoma and have significant market share in CNG equipment.

TGT would like to thank everyone that stopped by the display and the companies that made it possible.
